

Smart Capacitor

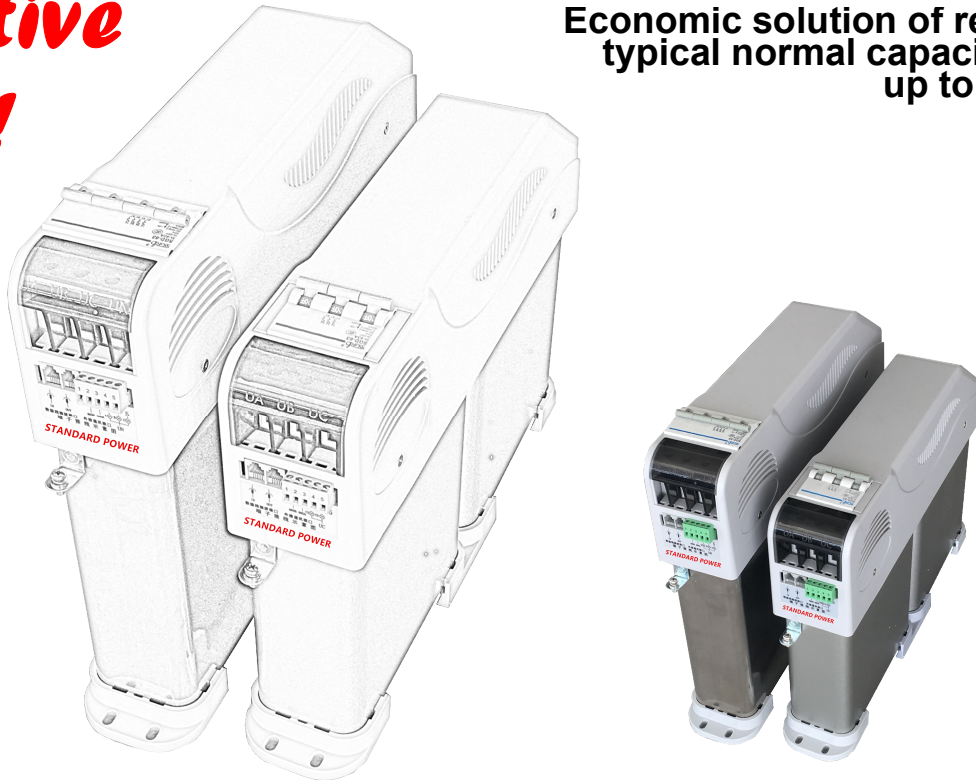

The Mini Capacitor Bank

Series SPGL smart, 5 to 120Kvar, Multi-steps

Smart/Automatic operation
Detuned/Filter selection
RS485/internet connection
Multi-steps & easy extend
Power Factor Correction (PFC)

**innovative
design!**

**Economic solution of replace to
typical normal capacitor bank
up to 120Kvar**

*very compact size
easy mounting
easy operation
flexible to install
easy to extend
very low cost*

*large size
non-flexible to install
uneconomical
high cost*

Features

- Innovative products of Mini Smart Capacitor (Detuned/Filter) Bank
- Economic solution of replace to the typical capacitor bank up to 120Kvar
- Intelligent operation with internal smart controller
- Three Phase, single phase or mixed model selection
- Static switch control selection
- Detuned/filter reactor of 7%, 14% etc. selection
- Circuit breaker disconnection
- RS485/Internet connection and control are available on request
- Excellent quality and low cost
- Smaller size, very easy to mounting and extend

The main rates

- 3Phase without reactor: 450V, 50/60Hz, 5 to 100Kvar, multi-steps
- 3Phase with reactor: 480V, 7% 189Hz, 50/60Hz, 5 to 60Kvar
- 3Phase & single control: 250V, 50/60Hz, 5 to 20Kvar, multi-steps
- 3Phase & single detuned control: 280V, 50/60Hz, 7%, 189Hz, 5 to 40Kvar

(other rates are available on request)
