

Moulded Case Circuit Breaker/MCB

Application

Switchgear system
Power factor correction system
Electric load control

High Power Quality
Long useful life
Environment Friendly

Series SPGL MCB

**New
design**

available on request*

APPLICATION RANGE

The rate insulation voltage of the breakers is 800V. suitable for turn-on or turn-off not frequently and starting a motor not frequently in the circuit of AC 50Hz, rate working voltage 400V, rate working current up to 800A. The breakers have over load, short-circuit and under voltage protection devices, so as to protect the circuit and the power equipment against damage. The breakers has disconnecting function, its corresponding symbol ix shown as “ — |x— ” .
