

Elliptic Capacitor

3Phase & Single Phase 50/60Hz Self-healing Dry PCB free
400V up to 50Kvar
415V up to 50Kvar
440/450V up to 60Kvar
480V up to 60Kvar
525V up to 60Kvar

Large capacity
Innovative temperature protection
High safety & longer service life
Power factor correction

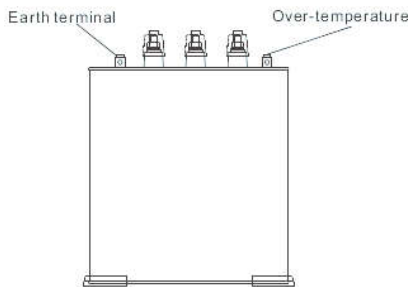

New

Innovative Over-Temperature Protection

Automatic cut off before capacitor over-temperature, renew operation

- It can withstand higher heating caused by system ambient temperature
- It can withstand higher heating caused by system overcurrent
- It can withstand higher heating caused by system overvoltage
- It can withstand higher heating caused by system harmonic
- It can be used as an early warning to improve the reliability of system safe operation
- It can prolong the service life of capacitor and reduce operation cost
- It can increase the capacity of a single capacitor and reduce the investment cost and reduce CO₂ emission

The main rates

230 to 1000V 50/60Hz up to 60Kvar
5Kvar, 10Kvar, 12.5Kvar, 15Kvar, 20Kvar, 25Kvar,
30Kvar, 40Kvar, 50Kvar, 60Kvar

Features

Large capacity,
Economic cost
Available over-temperature protection

Reference (The world top brands only)

Siemens, ABB, VW, GE, LS, Panasonic, Toyota, APP, Alcatel-Lucent, Hyundai, Michelin, Komatsu, Posco, Sheraton, Carrefour, Pepsico, Denso, Sinoma,,,
